## **TEACCH Autism: Universal Academy approach**

To achieve consistent Academy autism and AET standards, a consist approach will be employed by all staff to best support and develop social communication and problem-solving skills, to address sensory issues and promote emotional well-being for all pupils.

Therefore, we implement an enabling learning and communication environment in all teaching spaces through the following TEACCH principles of Good Autism Practice:

| TEACCH principle                          | Structured Teaching Strategy (every child)   | What it looks like in practice ?   |
|---|--|--|
| Physical<br>Structure and<br>Organisation | <ol> <li>Classroom environment is clear and<br/>manageable for children with ASD</li> <li>Physical environment is free of<br/>distracting stimuli</li> </ol>   | <ul> <li>Zoned activity areas are clearly defined with signage (e.g. for independent work, outdoor zone, group interaction, play, transition to wait and line up).</li> <li>Physical and visual boundaries (furniture, materials, tape on floor)</li> <li>Classroom arrangement allows for maximum independence (schedules, communication systems, individual equipment)</li> <li>Communication and new vocabulary is displayed in the classroom</li> <li>Cornerstones display in the classroom</li> <li>Phonics and reading display in the classroom</li> <li>Reading books in the classroom (e.g. Numicon)</li> <li>Zones of Regulation are displayed in every environment across the setting</li> <li>Classroom arrangement allows for supervision of all children (e.g. clear line of sight at all times)</li> <li>Sources of visual and noise distractions are minimised in work areas (e.g. displays kept to boards, no work on walls, pupil not seated near open window)</li> </ul> |
|   | <ol> <li>Classrooms are easy to identify and<br/>designed to address skills across the<br/>curriculum</li> <li>Environment is modified to match<br/>individual's needs, learning styles and<br/>sensory differences</li> </ol> | <ul> <li>Classroom materials are labelled and well organised and put away when not in use</li> <li>All surfaces are kept clear at all times</li> <li>The floor is clear at all times</li> <li>Daily activities consistently occur in designated areas</li> <li>Areas match individual stage and developmental level (e.g. snack, play, self-help, work area)</li> <li>Materials in each area are easily accessible</li> <li>Transition areas are incorporated into classroom space (e.g. lining up markings on floor, wait chairs).</li> <li>Observational, qualitative assessment is used to determine how individuals respond to physical environment and used to make changes to address individual needs</li> <li>Peterborough Paston Pack -sensory profile is used to inform observations across the day and different environments</li> </ul>  |

|                  |  | Zones of Regulation are displayed in every environment across the setting  |
|------------------|--|--|
|                  | <ol> <li>Environments across the school day are<br/>modified to match individual needs</li> </ol>  | <ul> <li>Visual and physical boundaries are in place (may be portable) and across all environments (e.g. outdoors, PE, lunch hall, Corridors, transition hubs, etc)</li> <li>Signs, symbols and floor markings are in place</li> <li>Zones of Regulation are displayed in every environment across the setting</li> </ul>  |
| TEACCH principle | Structured Teaching Strategy (every child)   | What it looks like in practice ?   |
|                  | <ol> <li>Visual schedules and related components<br/>are used consistently throughout the day</li> </ol>   | <ul> <li>Overall classroom schedule is prominently displayed next to the smartboard that indicates staff and child assignments. It is referred to at the end of each activity.</li> <li>Individual schedules are used constantly throughout the day</li> <li>Visual and verbal cues are used to prompt the individual to initiate use (check) their schedule</li> <li>Classroom areas are visually labelled with matching schedule components (e.g. pocket with matching object, photo, icon)</li> </ul>   |
|                  | <ol> <li>Individual schedules are designed to<br/>match developmental level, strengths<br/>and needs</li> <li>Individuals are taught how to use the<br/>visual schedule and how to address<br/>changes that occur in the schedule</li> <li>Visual Schedules are used within</li> </ol> | <ul> <li>TEACCH assessment is used to determine the appropriate schedule (e.g. form, length, location, method to manage)</li> <li>Individuals have their daily schedule adjusted to their stage and developmental level</li> <li>Individuals are prepared for changes in schedules activities (e.g. visual cue to indicate a change in the expected activity or person)</li> <li>Staff prompt individuals with minimal verbal/physical cues when teaching use of schedule</li> <li>Individual schedules move with child across setting OR elements of visual schedules are located across</li> </ul> |
|                  | classroom activities and outside of the<br>classroom throughout daily activities<br>(lunch, PE, Forest School, cooking room,<br>outdoor play)  | setting (e.g. transition cards, schedule cues, matching pockets)   |
|                  | <ol> <li>Overall classroom schedule is<br/>prominently displayed (next to the smart<br/>board) indicating staff and child<br/>assignments, locations and activities</li> </ol>   | • Activity symbols are removed once they are completed so children can see clear progress throughout their day and concept of 'finished' is explicit   |
| Work<br>Systems  | <ol> <li>Individualised work systems and related<br/>components are used consistently<br/>throughout the day</li> </ol>  | <ul> <li>A work system is in place for every child to use during independent work time (the organisation and structure of the work system should answer 4 questions for the individual:         <ol> <li>What work do I do?</li> <li>How much work?</li> <li>When am I finished?</li> </ol> </li> </ul>  |

| <ol> <li>Work systems are designed to match the individual's developmental level, strengths and needs</li> <li>Activities and tasks within the work system are related to identified goals, targets and objectives (of the curriculum/ learning profile/EHCP)</li> <li>Activities used in the independent work system are individualised</li> </ol> | <ul> <li>4. What activity do I do next?</li> <li>Work systems are used consistently during independent work sessions</li> <li>Individual is using work systems independent of teacher prompting</li> <li>The 4 questions of the work system are being visually answered during teaching sessions</li> <li>TEACCH assessment is used to determine appropriate length and format</li> <li>Components of the work systems are individualised to match developmental level (form, organisation and sequencing, concept of finished, what happens next and location of work materials)</li> <li>Activities incorporated into the work system are meaningful and relevant to the child and focus on their independent: <ul> <li>learning profile</li> <li>EHCP goals</li> <li>Functional life skills</li> <li>Independent daily functioning skills (OT)</li> <li>Fine motor skills</li> <li>Academic goals and objectives</li> <li>Speech and language goals</li> </ul> </li> <li>Tasks used in independent work areas reflect previously mastered skills and re rotated on a regular basis to allow for revisiting skills and focus on: <ul> <li>using skills in a flexible manner (applying and problem solving)</li> <li>the generalisation of skills across environments, people and materials</li> </ul> </li> </ul> |
|---|---|
| <ol> <li>Work systems are used across the<br/>classroom and beyond independent<br/>sessions (eg: art, PE, hygiene, circle time,<br/>cooking room, lunch time, play time,<br/>Forest School)</li> </ol>  | <ul> <li>The 4 questions above are answered visually for individuals when they arrive at a number of school locations/participate in a number of school activities</li> <li>An individual work system might be used during different classroom activities if needed. Eg: circle time, self-help skills, reward time.</li> </ul>   |
| <ol> <li>Individuals are following material<br/>structure and visual support independent<br/>of teacher prompting</li> </ol>  | <ul> <li>Written/visual instructions are provided in all activities and work tasks</li> <li>staff do not rely on giving verbal prompts</li> </ul>   |

| Material   |  | <ul> <li>visual instructions are individualised to match child's developmental level (e.g. materials, pictures,<br/>lists)</li> </ul>   |
|--|--|---|
| Structure<br>and Visual  | <ol> <li>Tasks and activities are visually clear and<br/>individualised to meet need</li> </ol>  | <ul> <li>Elements of visual organisation are incorporated in work tasks and class activities: materials are contained, stabilised, segmented and limited as needed by the individual</li> <li>Tasks and activities are organised in a variety of formats (ie: folders, books, trays, baskets)</li> <li>Visual clarity is provided in work tasks can class activities (ie: use of colour coding and highlighting)</li> </ul> |
| Supports   | 3. Tasks are meaningful and engaging   | Individual interests are incorporated into the tasks and activities   |
|  | <ol> <li>Material structure and visual supports<br/>are used throughout the individual's daily<br/>activities (ie: independent work, teaching<br/>sessions, PE, playtime)</li> </ol> | <ul> <li>Created to explicitly teach the generalisation of skills and strategies</li> <li>Created to teach flexibility</li> </ul>   |
| TEACCH principle   | Structured Teaching Strategy (every child)   | What it looks like in practice ?  |
| Behaviour  | <ol> <li>Behaviour management strategies are<br/>influenced by an understanding of the</li> </ol>  | <ul> <li>Behaviour challenges are analysed and reframed from the perspective of the child with ASD (iceberg<br/>model)</li> </ul>   |
| Management   | learning styles of autism  | <ul> <li>Behaviour interventions are designed and implemented around an understanding of the<br/>developmental level of the individual with ASD</li> </ul>  |
| Challenging Dehaviour<br>Provide State |  | <ul> <li>The individual child's EHCP provision is delivered for each area of need as this underpins behaviour management</li> <li>Emotions, feelings and self-regulation strategies are explicitly taught through Zones of Regulation each</li> </ul>   |
|  |  | <ul> <li>day</li> <li>Each child has a personalised individual map of sensory and physical activities to aid their self-regulation</li> </ul>   |
|  |  | • The critical language of Zones of Regulation and Think Social are used consistently in all situations, ie:<br>'What Zone are you in?' 'Is it a big or little problem?' Expected vs unexpected behaviour, 'How do you<br>feel today?'  |
|  |  | <ul> <li>Reduced language without metaphor or sarcasm</li> <li>Enough time to process language</li> </ul>   |

|  |  | All transitions are calm and planned and escorted by adults  |
|--|--|--|
|  |  | Dismissal for taxi collection is through MS teams and radios are not used                            |
|  |  | Distraction limited environments across all school areas and zones                                   |
|  |  | Sensory and movement breaks are contained within individual schedules throughout the day             |
|  | 2. Behaviour management strategies are   | Behaviour management strategies emphasise positive, antecedent based approaches and the              |
|  | primarily proactive                      | prevention of behaviour problems   |
|  | 3. Behaviour problem solving process     | Meaningful structure is modified or developed  |
|  | guides the intervention to address the   | New expressive communication skills are taught   |
|  | behaviour                                | Social skills are taught (explicitly through Zones and Think Social)                                 |
|  |  | Coping and emotional regulation skills are taught (explicitly through Zones and Think Social)        |
|  | 4. Positive behaviour support plan is in | TEACCH assessment is used to inform the behaviour solving process                                    |
|  | place for staff response when the        | EHCP provision is securely in place for the individual   |
|  | behaviour occurs                         | • A positive behaviour support plan is written, reviewed and all staff are informed through briefing |
|  | 5. Data are constantly recorded on       | An effective system for collecting data has been established (ABC charts)                            |
|  | behaviour plans and                      | Data is monitored on a regular basis (CPOMS)   |
|  | summarised/analysed regularly            | Interventions are modified based on data collected (TEACCH behaviour problem solving process)        |
|  |  |  |
